ROUVIER - PATRIMOINE, Class C (LU1100077442)

a sub-fund of ROUVIER SICAV

Management Company: ROUVIER ASSOCIÉS

Objectives and investment policy

Investment objective: ROUVIER - PATRIMOINE is a medium-term cash management tool. The sub-fund attempts, over a period of more than 2 years, to generate a performance higher than an investment in euro zone state bonds with an equivalent duration, represented by the benchmark index.

Benchmark index: EMTX (Eurozone Government Bond Indices) 1-3 years index, calculated with net coupons reinvested.

Investment policy: The sub-fund invests at least 70% of its assets in bonds issued in OECD countries, listed in euros and rated at least BBB- (Standard & Poor's or equivalent). It strives for surplus performance relative to its bond investment through the investment from 0% to 30% of the sub-fund:

- in the equities of companies listed on the regulated financial markets of OECD countries. The sub-fund therefore most often seeks out quality companies that are likely to be retained over the long term.
 - in indexed debt instruments (convertible, Oceane convertible bonds, bonds, profit participation certificates, NDI) or in fixed or variable rate bonds. These debt instruments and bonds can have a rating lower than BBB- (Standard & Poor's or equivalent), the sub-fund can therefore invest in high yield bonds, i.e. speculative bonds. They are issued in OECD countries and have no maturity constraint. The management is primarily based on an analysis of the performance potential of the underlying, and on an analysis of the capital guarantee provided by the issuer or the market.
- The percentage of the sub-fund's investment in these two types of investments varies from 0% to 30% according to the opportunities provided by the market, with the understand-

ing that the sub-fund is very selective regarding the investment quality and the acquisition price.

The issuers of the securities in which the sub-fund invests can be from all sectors, all capitalisation sizes including small caps and ones from outside the euro zone (from 0% to 30%), but listed on the financial markets of OECD countries.

Primary Language Changed - From time to time, the sub-fund may invest in the derivatives markets, but exclusively and specifically for the following purposes:

- to protect its investments against a fall in the equity or foreign exchange markets;
- to improve their performance by seeking a better buy or sell price.

The sub-fund's overall exposure will be limited to 100% of the net assets.

The assets may be invested in coordinated European UCITS up to a limit of 10% of the net assets, including a maximum 5% in money market UCITS.

Investors requiring a more detailed description of the investment strategy and the assets employed should refer to the prospectus.

Income appropriation: capitalisation

Recommendation: More than 2 years. This sub-fund may not be appropriate for investors who plan to withdraw their money within this period.

Redemption of shares: The investor has the right to redeem his shares on demand. The dealing in shares is carried out on each common bank business day in Luxembourg and France. The attention of the investor is drawn to the fact that in exceptional circumstances, the possibility for the investor to request the redemption of his shares may be limited or suspended.

Risk and reward profile

What does this synthetic indicator mean?

The shares of Class C are classified in category 3 because the value of the share may be subject to medium variations and consequently the risk of loss and the opportunity of gain may be moderate.

The risk category has been determined on the basis of historical data and may not be a reliable indication of the future risk profile. The risk and reward category shown does not

necessarily remain unchanged and the categorisation of the sub-fund may shift over time. The lowest category does not mean a risk-free investment. Repayment of the initial investment is not guaranteed.

Which materially relevant risks are not adequately captured by the synthetic indicator?

Risk of the impact of using financial techniques involving futures instruments: the use of derivatives may give rise to significant upward or downward fluctuations in the net asset value over short periods.

How can I get more information about the risks of the sub-fund?

Additional information concerning the risks of investment in the sub-fund is indicated in the corresponding section of the prospectus of the fund which is available at the Management Company and on the website www.rouvierassociés.com.
